Capstone Milestone 1: Architectural Blueprint

1. Executive Summary and Problem Statement.
2. Functional and Non-Functional Requirements breakdown (IEEE 830 compliant).
3. Microservice decomposition: Auth Service, Document Engine, Event Bus.
4. System Sequence Diagrams for primary business workflows.

Capstone Milestone 2: Verification and Security Guidelines

1. Authentication: OAuth2 Bearer Tokens with JWT signature validation.
2. Data Protection: AES-256 for documents at rest, TLS 1.3 in transit.
3. Test Strategy: Minimum 80% branch coverage on core domain logic.
4. Automated CI/CD execution with GitHub Actions and Docker containerization.
